

EHS Tracker, Available as a Microsoft Azure App, Manage Regulatory Compliance of Environmental, Occupational Health and Safety Requirements

MICROSOFT AZURE SOLUTION BUILDER PROFILE: STS SOFTWARE LLC

STS Software develops solutions for highly regulated industries. EHS Tracker, hosted on Microsoft Azure, enables global management of regulatory compliance for environmental, occupational health and safety concerns. EHS Tracker integrates a web-based app while implementing the best practices of ISO-9001, ISO-14001, and OHSAS-18001 standards.

WHAT WE OFFER

ISO-14001 EMS

A complete Environmental Management Systems (EMS) module to manage all of the regulatory compliance data collection, analysis, and automated tracking and reporting of allowed environmental parameters and permit requirements. Be in regulatory compliance at all times!

OHSAS-18001

A complete Safety Management System (SMS) for daily application of the best employee health and safety management practices, incident management, hazard identification, evaluation and mitigation, field inspections and audits, recordkeeping and automated reporting.

ISO-9001 QMS

Integration of quality management best practices such as corrective and preventive actions tracking; management of nonconformances and audit results; automated tracking of indicators such as incident rates and lost time; statistical analysis; and notifications of due dates and events.

CLOUD-BASED

A web app available on the Microsoft Azure solutions catalog. Offered as a service, it's ready for multi-language and global cloud-based deployments as a single or multi-tenant application with mobile analytics and a reporting portal ready for all mobile platforms and user levels.

WHAT OUR CUSTOMERS ARE SAYING

"The essential tool for successful management of internal and external EHS compliance audits." – Vimaris Ortiz, EHS Manager, Cooper Vision LTD

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
