

EHS TRACKER SOFTWARE

COMPLIANCE  
WITHOUT  
PAPERWORK,  
WITHOUT  
PROBLEMS.

The Indispensable Tool for Integrated Management  
of Environmental, Occupational Health and Safety.

 **EHS TRACKER™**  
POWERED BY STS SOFTWARE

INTEGRATED MANAGEMENT OF  
ENVIRONMENTAL, OCCUPATIONAL HEALTH  
AND SAFETY:

## Simplify the EHS compliance process and data management **EHS Tracker**

EHS Tracker: The Indispensable Tool for Integrated Management of Environmental, Occupational Health and Safety.

Our software is designed to provide an information platform with integrated approach that provides standardized tools for handling and capture of EHS compliance data, minimizing risks of regulatory non-compliance, costly fines, violations of permits, law suits or non-conforming internal or external audits. It is the ideal tool for organizations and EHS professionals seeking to standardize processes and ensure compliance, sustainability and continuous improvement of their company operations.

**The essential tool for successful management of  
internal and external EHS compliance audits.**

# Solution Highlights

These are the reasons why EHS compliance professionals from some of the largest companies in the world choose EHS Tracker:

## Adaptable

EHS Tracker can be configured to fit your organization: configurable parameters such as organizational structure, authentication methods, access and security profiles, among others.

## Configurable Reports

Allows the automation and design of reports, execution metrics and incident KPIs by organizational structure customized to your reporting needs.

## Digital File Management

EHS Tracker organizes all documentation and files digitally, complying with the requirements of regulatory frameworks, as well as norms and international standards such as ISO-14001, ISO-45001 and OHSAS-18001. The essential tool for the successful management of internal or external EHS compliance audits.

## Compliance Monitoring

EHS Tracker helps you stay on top of all corrective, preventive actions, expiration dates, permits and compliance reporting, generating notifications via e-mail to users and administrators or exportable MS Outlook calendars.

## IT Platform Options

EHS Tracker is a web application 100% compatible with the internal corporate IT computing or cloud based platforms. The solution is offered in Software-As-Service or with traditional licensing for Windows Servers with SQL database. The solution is also available globally in multiple languages on the Microsoft Azure Cloud platform.
